1. Coffee exports

Coffee exports in November 2024, amounted to 400,536 60-kilo bags, worth US\$ 108.91 million as shown in Fig 1. This comprised of 342,982 bags of Robusta valued at US \$ 91.66 million and 57,554 bags of Arabica valued at US\$ 17.25 million (see Table 1 and Annex 1). This was a decrease of 6.00% in quantity and an increase 53.98% in value compared to the same month last year.

By comparing quantity and value of coffee exported by type in the same month of last Year (November 2023), Robusta increased by 1.20% and 72.44% in quantity and value respectively, while Arabica exports decreased by 33.98% and 1.86% in quantity and value respectively

The monthly coffee exports volume was lower than the previous year. This was seen in Arabica exports due to the bi annual off year cycle coupled with poor flowering in Mt. Elgon region. The value of coffee exports was however higher due to the increase in global coffee prices as a result of dry conditions in Brazil and Vietnam, the world's largest producers of Arabica and Robusta coffee respectively that are seen to affect coffee crop yields and, therefore, a likelihood of supply deficit in 2024/25 .

Coffee exports for twelve months (December 2023-November 2024) totaled 6.36 million bags worth US\$ 1.50 billion compared to 6.14 million bags worth US\$ 959.13 million in the previous year (December 2022-November 2023). This represents an increase of 3.63% and 56.39% in quantity and value respectively.
