1. Coffee exports

Coffee exports in June 2021 amounted to 618,388 60-kilo bags worth US\$ 58.56 million as shown in Fig 1. This comprised 565,449 bags of Robusta valued at US \$ 50.25 million and 52,939 bags of Arabica valued at US\$ 8.31 million (see Table 1 and Annex 1). This was an increase of 47.04% and 46.63% in quantity and value respectively compared to the same month last year.

By comparing quantity of coffee exported by type in the same month of last Coffee Year (June 2020), Robusta increased by 63.89% and 72.56% in quantity and value respectively, while Arabica exports decreased in both quantity and value by 29.93% and 23.16% respectively.

Increasing Robusta exports during the month compared to the previous year were due to newly planted coffee which started yielding supported by favourable weather. This was also compounded by a positive trend in global coffee prices in the last two weeks of the month which prompted exporters to release their stocks on top of increased procurement. The decrease in value of Arabica coffee was due to low volumes exported. Arabica monthly exports continued to reduce compared to the previous year attributed to the off-year biennial cycle characteristic of Arabica production.

Coffee exports for the 12 months (Financial year 2020/21) amounted to 6,078,638 60-kilo bags worth US\$ 559.26 million compared to 5,105,881-kilo bags valued at US\$ 496.28 million the previous year (Financial Year 2019/20). This represents 19.05% and 12.69% increase in both quantity and value respectively (Figure 1). The quantity of coffee exported in June was the highest in a single month while the total quantity of exports in 12 months was the highest in 30 years.

6. Global Situation

World coffee exports amounted to 9.79 million bags in May 2021 compared to 10.89 million in May 2020. Exports for the first 8 months of coffee year 2020/21 (October 2020-May 2021) increased by 2.2% to 87.3 million bags from 85.38 million bags the previous period (October 2019-May 2020). The ICO Composite Indicator price increased by 4.6% to 141.03 US compared to 134.78 US cents in May 2021. The prices have seen a positive trend since October due to an expected reduction in supply in key producing countries. Global coffee production for 2020/21 is estimated to increase by 0.3% to 169.5 million bags while the consumption is estimated to increase by 1.9% to 167.24 million bags.

7. Local Situation

During the month of June 2021, farm gate prices ranged from Sh.2,000-2,500/= per kilo of Kiboko (Robusta dry cherries); Shs. 4,200-4,500/= for FAQ; Sh. 6,500-6,800/= for Arabica parchment; and Sh. 5,500-6,000/= per kilo for Drugar from Kasese. Robusta Kiboko averaged UGX 2,250/= per kilo; FAQ UGX 4,350/= per kilo, Arabica parchment UGX 6,650/= per kilo and Drugar UGX 5,750/= per kilo.

8. Coffee Development and Promotional Activities

During the month of June 2021, some key milestones, achievements and challenges were recorded. In respect to coffee pests and disease surveillance, there were incidences of BCTB-Black Coffee Twig Borer, Coffee Berry Borers (CBB), Coffee Stem Borer (CSB), Coffee Leaf Rust (CLR), and mealy bugs reported in both Arabica and Robusta growing areas. However, these did not reach significant economic injury levels except in South West where Coffee Leaf Rust(CLR) on Arabica coffees reached significant levels. By the end of the month, a cumulative total of **28,110,890 coffee seedlings** were distributed for planting: 7,042,550 seedlings in Elgon; 9,032,159 in Rwenzori, 8,549,000 in South West and 3,487,181 in Northern region. Meanwhile, under the coffee rehabilitation and renovation programme, a cumulative total of **2,815,833** old and unproductive coffee trees were stumped in different regions: **Central** 19,900 trees for 346 farmers (258 Male, 88 Female); **Elgon** 1,592,539 trees for 5,263 farmers (4,376 Male, 886 Female & 13 Youth); **Rwenzori** stumped 256,160 trees for 1401 farmers (1,178 Male & 187 Female); **South West** 627,297 trees for 49,815 farmers (36,269 Male & 13,546 Female); **Eastern** 83,884 trees for 4,798 farmers (2,810 Male, 1,704 Female & 284 Youth); and **Western** 236,053 trees for 765 farmers (666 Male, 97 Female & 2 Youth). For Northern (Mid North/West Nile) and Greater Masaka, no verifiable stumping figures were recorded. Distribution and application of organic fertilizers on stumped coffee trees started with Elgon region for all farmers who agreed to stump their coffee. The total beneficiaries were 5,263 farmers (4,376 Male, 886 Female & 13 Youth) receiving a total of **42,436 (25kg) bags of organic fertilizers** to boost the rejuvenation of stumped trees. Distribution of the fertilizers will continue in other regions starting July 2021 in Western Uganda and to the rest of other regions in the subsequent months. Other production activities undertaken included: Coffee farm visits by Extension staff and the commencement of the countrywide soil mapping exercise spread in 45 sampled districts. This exercise is intended to establish the soil fertility status in coffee growing regions to determine the suitable fertilizer combinations and application rates. This activity will compliment the soil testing and analysis scan machines provided last month to our coffee extension staff to assist coffee farmers to quickly determine the soil status for their coffee fields and the correct soil – fertilizer requirements. The major challenge recorded was the movement restrictions due to COVID-19 pandemic, that constrained and/or slowed the pace at which some activities were implemented. However, movement permits have been acquired for field staff to continue with extension service delivery as they observe Standard Operating Procedures(SOPs)

9. Outlook for July 2021

Coffee exports are projected to be 650,000 bags as the main harvesting period in Greater Masaka and South Western regions reaches its peak during the month. Dry weather coupled with some rains will speed up ripening and procurement of the coffee from the countryside. Increased exports are also likely to be driven by increasing global coffee prices exhibited in the last two weeks of the previous month on account of reduced harvest from Brazil and Vietnam which will stimulate exporters to also release their stocks.
